Mr. Ferrazzi,

Sorry our phone conversation got terminated because of bad connection quality.

As I was saying, drilling regulations, including surface handling of drilling muds and drilling sumps are found under the California Division of Oil, Gas, and Geothermal Resource (CDOGGR) "Onshore Well Regulations" of the California Code of Regulations at ftp://ftp.consrv.ca.gov/pub/oil/regulations/PRC04_January_11.pdf. Those subject portions/activities are not regulated under the program in which I work, namely the Underground Injection Control program of the Safe Drinking Water Act.

Please let me know if you need to discuss further.

George Robin (robin.george@epa.gov)

Engineer, Underground Injection Control

Subject: Storage of Drilling Waste Drilling Mud-Inglewood Oil Field

Importance: High

To all,

Attached are satellite images of the Inglewood oil field that seem to indicate that areas of the Inglewood oil field were or are being used for the storage of waste drilling muds.

Please let me know what your thoughts are and if this is lawful under current California regulations.

I am not sure which agency has the regulatory authority over this subject.

Thank you.

Paul V. Ferrazzi
